

HANDS-ON TWO-DAY COURSE

Bioclear Restorative Solutions for the Pediatric Dentist

The most comprehensive, esthetically driven composite training offered to pediatric dentists. Using warmed composite, injection molding and clear anatomical matrices, you'll return to patient care the following week with an **entirely new skill set** for the primary and permanent dentition.

2 full days

Didactic plus extensive hands-on training

Small group

Hands-on, under the microscope

All dentitions

Primary & permanent, anterior & posterior

Mentoring

Post-course support included

What you'll learn

1 DAY ONE · POSTERIOR

- Transitioning from GV Black to Clark Class II non-retentive preparations for composite
- Predictable, esthetic Class II restorations that mimic natural teeth
- Treating severely hypoplastic / carious molars without stainless steel crowns
- Proper biofilm removal for predictable sealants and composites
- Quadrant strategy for multiple posterior Class II restorations

2 DAY TWO · ANTERIOR

- Class III restorations in primary and permanent teeth
- Class IV fracture repairs that ensconce the tooth in composite
- Restoration of peg laterals
- Treatment planning tooth-size discrepancies pre- and post-ortho
- Dental photography — from intraoral camera to DSLR
- Electronically controlled intraosseous local anesthesia **NEW**
